

PROCEEDS FROM CARNIVAL OVER \$6000 —LARGE CROWDS ENJOY THE FUNFEST

Rain Spoils the Sports But Adds Zest to the Carnival—
Expenses Higher This Year Than Last, Profit About
\$1500—J. Jenkinson, Michel, Wins the Car, Ticket
No. 1510, D. L. Martin, Coleman, the Washing
Machine, Ticket No. 568.

Coleman's 1926 Carnival and Sports Day is now history, but the kind of history that makes pleasant reading to all those who have the interest of Coleman at heart. While rain spoiled the splendid sports program arranged for July 1st, it did not in any way adversely effect attendance at the Carnival in the Arena, although it possibly cut four or five hundred dollars off the profits of the combined events, and this is the only regrettable feature of the big affair.

Booth sales this year exceeded last year's takings from this source by \$215.65, and the revenue received from the dance floor was at least three times as great as that of 1925, but both the car and washing machine receipts were considerably less, \$973 in the case of the car and \$183 less from the washing machine.

Following is the complete takings from all sources:—

Booths	\$4177.65
Dance	460.00
Car	1010.00
Washing Machine	121.50
Tags	235.00
Total	\$6004.15

Last year's total receipts amounted to \$6,250.00, so it will be seen that this year's receipts were but \$245.85 less than was the case in 1925. However, this year's expenses are considerably heavier and it is doubtful if our net profit will be any more than half what it was last September when it reached close to \$3000. Nevertheless the result is well worth the effort, as aside from the monetary assistance given the three organizations, the hundreds of people who thronged the Arena during Carnival nights got barrels of fun out of parting with their money.

Great credit is due all the members of the Carnival Committee, the local Elks Lodge and members of the Swimming Pool Committee, the citizens at large as well as the hundreds of visitors from neighboring towns, who gave of their time and money so freely to make Coleman's second Carnival the unequalled success it was. Special mention is due to Mr. J. Downie, who so capably filled the dual position of Carnival Secretary and Treasurer.

Notes on The Carnival By "Spielman"

It was a real mirthquake, and then some!

Twelve p. m. Saturday did not come any too soon for many of the booth attendants, most of whom were minus their vocal powers and almost "out" on their feet.

J. M. Allan and Jack Rushton, chief and assistant chief of Stores and Supplies, were kept on the jump dishing out the prizes and checking up supplies. They grew a few grey hairs Friday night when it was discovered forty blankets could not be accounted for. Saturday morning brought relief when it was discovered that these 40 members of the blanket family had been left in an up town warehouse. You can't lose anything with a Scotchman in charge.

Some ten booths, plentifully stocked and prettily decorated, were in charge of the following "high pressure" salesmen:—

Fiegh Dolts—Wm. Antel, Rolt, Wilson.

Bacon and Ham—Geo. Brown, H. (Smoky) Antel, H. Shieratt, E. W. Brown.

Tray, Lamp and Parasol—W. S. Purvis, W. Johnson, Mrs. W. S. Purvis.

Ruboons and Toys—Charlie Stevenson, Ed. Woods, Arthur Duffield. Baby Dolls—Sid. White, Charlie Graham, H. Clarke.

Blankets—Maurice Cooke, J. M. Allan, Jack Woods, Geo. Pattinson. House—Housie No. 1—Sid. Short, Charlie Oumette, Geo. Graham.

Gold Fish—Albert Knowles, J. Ferko.

Chickens—H. C. McBurney, E. F. Gare.

Housie Housie No. 2—Tommy Burns, Jack Stokes, Felix Brennan, Bala Johnson.

Cocoanuts—T. Holstead, A. E. Brockelhurst, Earl Price, A. Lousbury, J. McDonald, Everett Price.

Master of The Exchange and Collector of Customs, Jack Downie, was kept as busy as the proverbial bee gathering the "honey" from the various booths and his labors did not cease each night when the Carnival closed, as he had to tote up columns of figures and do together brain calisthenics in his work of looking after the finances.

The Town and McGillivray Pipe bands enlivened the proceedings during the day July 1st. They heroically paraded around in the rain during the morning and played in the Arena in the afternoon when the sports were cancelled. Their lively music helped to keep the crowd in good humor, and made them forget about the rain.

Watchman, What of the Night? Messrs. Wm. Chapman and Ben Levi were in charge day and night at the Arena to watch over the thousands of dollars worth of Carnival supplies. They were not a sleep on the job. Very little if any petty thieving was reported.

The Elks, Swimming Pool and Arena Committee have to thank not only the citizens of Coleman for their generous patronage, but also many of our friends from the neighboring towns of Blairmore, Bellevue, Hillcrest, Frank, Michel, Natal, and other points both east and west, who contributed largely towards the success of the Carnival. Thanks folks!

Alex Morrison's Amazon Band made a real hit with the crowd on the opening day. For real musicians and feminine beauty combined Coleman leads the world. Shiek band leaders need not apply.

The cause was well worthy of the effort made to put it over was the consensus of opinion of most of the tired workers on Saturday night.

COLEMAN FIRST AID TEAMS WIN IN ST. JOHN AMBULANCE CONTESTS

International Coal Co.'s Team Gets Coderre Cup, McGillivray Team Secures Third Place.

According to a letter received on Monday by Mr. J. M. Rushton, secretary-treasurer of the local branch St. John Ambulance Association, Coleman teams competing in the various events held under the auspices of St. John Ambulance Association, have again brought high honors to Coleman.

In the competition for the Montizambert Cup (championship of Canada) the International team secured 4th place. For the Coderre Cup, (Dominion championship for teams composed of miners) the International team won the cup, while McGillivray team took 3rd place.

In the Alberta Provincial Championship the International team again won first place and McGillivray team seventh.

The personnel of the teams were as follows:—
International team—Capt. R. Greenhaigh, J. Kerr, H. Parkinson, A. Kay, spare man James Glenndening.

McGillivray team—Capt. W. White, W. H. Garner, A. Morris, A. McCulloch, spare man A. Leitch. The Examiner, Col. Chas. A. Hodgetts, of Ottawa, was in Coleman on May 20th and 21st, when the examination took place. Col. Hodgetts has been travelling for over three months, going from one end of the Dominion to the other, examining the large number of contestants in the various events. It is of interest to note that four years ago both the Montizambert Cup and the Coderre Cup were held in Coleman by the International team.

BLAIRMORE TENNIS PLAYER WINS GENTS SINGLES COLEMAN GETS DOUBLES IN C.N.P.T. TOURNAMENT

In spite of lack of co-operation on the part of the weather man, the first annual tournament of the newly formed Crow's Nest Pass Lawn Tennis Association, played on the courts of the Coleman Tennis Club, was an unequalled success. Although the entries in the ladies' events were light, the total for the five senior events amounted to over forty. There are six clubs in the association, Fernie, Corbin, Blairmore, Blairmore West End, Blairmore United Church and Hillcrest, and all were represented in the play, the members of the British Columbia clubs remaining until they were finally eliminated in spite of the unsettled state of the weather.

A steady downpour commencing at nine o'clock in the morning and continuing throughout the day made it impossible to play off a single event on Dominion Day. The rain continued throughout the night and during the early part of Friday morning, but the sun shone through in time to make play possible at four o'clock in the afternoon. The four brick dust courts of the Coleman club were in excellent condition and remained so throughout the play. The courts have been surfaced with calcium chloride, retaining just enough moisture even in the hottest weather.

er to provide a dustless true surface that is cool underfoot.

There were several upsets in the play, perhaps the outstanding one being the win over Hinks of Corbin, a Southern Alberta champion, by Houbregge of Blairmore United Church, who is still a junior. Clockwork steadiness and excellent physical condition gained the ascendancy over the court generalship and fine racket work of the veteran.

Men's Doubles
McLeod and Barnes of Coleman, won out in the finals of the men's doubles, capturing the Blairmore cup.

Ladies' Singles
International cup: Mrs. Kerr of Blairmore West End vs. Mrs. Purvis of Coleman. Finals to be played this week.

Ladies' Doubles
Hillcrest cup: Mrs. Cruikshank and Mrs. A. Rose of Hillcrest vs. Mrs. Kerr and Miss Marquis of Blairmore West End. Finals to be played this week.

Men's Singles
Finals—Rae and Houbregge, both of Blairmore.

Mixed Doubles
Finals—Mrs. Purvis and Barnes of Coleman vs. Miss A. Marquis and Hnatyshyn of Blairmore West End. Finals to be played this week.

FIRST ANNUAL CONTESTS A.C.N.P. FIRST AID ASSOC. HELD IN COLEMAN JULY 1, PROVED VERY SUCCESSFUL

Dominion Day saw the first contests held at Coleman under the auspices of the Alberta Crow's Nest Pass First Aid Association, with Messrs. M. Johnson, D. Davidson, and several others of the committee in charge of the affair.

The inclement weather prevented the contests from being staged on the sports grounds as was intended and they were held in the Arena building.

There were six teams of five men each competing in the senior contest, which was held from 10 a.m. to 3 p.m., with the following results and marks obtained by the teams: International, Coleman, marks 451, 1st prize.

Blairmore No. 2, marks 435, 2nd prize.

McGillivray, Coleman, marks 427, 3rd prize.

Bellevue No. 2, marks 422, 4th prize.

Bellevue No. 1, marks 421, 5th, souvenir.

Blairmore No. 1, marks 402, 6th souvenir.

Following is the personnel of the teams:

International—R. M. Greenhaigh (Capt.) A. Kay, H. Parkinson, J. Kerr, J. Glenndening.

Blairmore No. 2—M. H. Congdon (Capt.) T. Vyprava, C. Thompson, W. North, T. Evans.

McGillivray—W. White (Capt.) A. McCulloch, R. Morris, H. Garner, Alex. Leitch.

Bellevue No. 2—B. Milnes (Capt.) F. Padgett, J. Shevels, C. Johnson, F. Hallsworth, F. E. Millatt.

Bellevue No. 1—J. Milnes (Capt.) J. Radford, E. C. Costick, J. Longworth, G. W. Goodwin, H. Blake.

Blairmore No. 1—W. H. Chapell, Jr. (Capt.) D. Martin, J. McAndrew, F. Wheatley, F. Gavelin.

The Junior classes were divided into two classes, boys over 15 and those under 15 years of age, with

(Continued on Page Eight)

Echoes of The Carnival By "Spielman"

A great deal of credit is due those valiant workers who so generously gave their time many evenings previous to July 1st, in erecting booths, decorating the Arena and around town. Among those who were active in this work were: Messrs. J. M. Rushton, J. H. Boulton, W. Antel, Geo. Brown, H. Sherratt, E. Wilson, C. W. MacKinnon, E. Marsden, J. M. Allan, and J. Downie.

Even the gold fish had a whale of a time.

Rain and Carnivals in Coleman go hand in hand. Both 1925 and 1926 Carnivals were officially ushered in with rainstorms.

Never mind Elks, citizens and friends, we put the "old thing" over with a bang!

A. M. Morrison, E. R. B. P. O. ELKS, No. 117, C. C. R. B. and M. C. C. to give him all his letters of distinction, was on the job all the time seeing that things were running smoothly.

The car and washing machine ticket sellers were ably led by Jack Houghton, Ernie Marsden, Wm. J. Burns, Alex. Morrison, Mrs. A. Corbett, Mrs. J. A. Price, Harry Boulton, Jack Rushton, Jesse Miller, Felix Brennan, T. T. Burns, and many others.

Messrs. F. J. Lote and Roy Hart put in three busy evenings attending to the requirements of thousands of dancers. This feature of the Carnival proved even more popular than was the case last year.

Harry Boulton, who had charge of the big sports program on July 1st, and who did a lot of hard work, unfortunately made arrangements for everything except the weather. Harry says that next time he intends reversing the order of things. He is going to "fix it" with the weather man first and then arrange his program. Here's hoping he succeeds.

Despite the wet weather on July 1st, one out door event was staged with a fair measure of success, the children's parade. Something over six hundred children braved the rain and paraded to the grounds, received their flag and 20c provided by the local Elks. Had the weather been favorable, at least one thousand would have been in line.

Thanks are due the management of the Calgary "Brewers" and the Coleman "Miners" football teams for generously agreeing to forego the \$100 prize in the football game. The boys were set on playing a game and went to the grounds and played in the pouring rain. The Brewers won 4-1.

Rain insurance will have to be taken out next year when we hold our sports on July 1st. We don't need it for the Carnival, however, as the harder it rains the better the business in the big Arena.

Wm. Bell, proprietor of the Grand Union hotel, has received a letter from the Calgary Brewing Co., thanking him for the hospitality shown the visiting footballers. Every member of the team was kept royally entertained by the management of the Grand Union hotel, and according to the letter received by Mr. Bell all the boys will long remember their visit to Coleman.

Itney dances on the big floor in the Arena proved one of the most popular attractions each evening. The music supplied by the Imperial Orchestra more than satisfied the dancers.

If "Smoky" Antel and Albert Knowles have anything to learn about selling gold fish and bacon we haven't heard of it. Either of these gentlemen could make a fortune selling less to the Equinox.

100,000 Feet of Choice Building Material at a SACRIFICE PRICE!

I recently purchased from a lumber mill in British Columbia 100,000 feet of choice lumber at a very low figure, and as I have not the room to store this for any length of time in my yard at Coleman, and desiring to give my customers the benefit of the bargain I got on this lumber, am offering the following unheard of prices:—

Boards 10 and 12 in. wide, at per M \$23.00

Flooring, Ceiling and Siding from, up \$25.00

(This is a wonderful bargain. Come and see it.)

Shingles in 3 grades, from \$4.00 per M up.

Turnings, such as Verandah Posts, Newels, Balusters, etc., also oak mouldings, any design, at 10 per cent less than any mill order house.

Bring Your Catalogues.

Tiffany Bread Wraps Create a Sensation

There's quite a stir in the baking industry over the new Tiffany Bread Wrap.

The secret of it is the fancy lace pattern in the wax paper that bespeaks higher quality—and the fact that the lace design hides folds or creases in the wax, keeping the loaf fresh looking.

The beauty of this wrapper makes an instant appeal to the housewife.

Each wrapper is an effective selling force wherever the bread is displayed.

Write for samples and prices to-day.

Holiday In Canada

Taking a holiday is "good business," provided the holiday is spent in a sane, sensible manner and largely out of doors. Such a holiday is likewise well paid for by insurance. Money spent in a vacation in the open will prove a good investment and return handsome dividends in renewed vigor, increased energy to put into one's life work, and re-awakened enthusiasm and interest in life and all its manifold activities.

To the full extent possible people should spend the summer months in the open. Fresh air and sunshine are the best doctors in the world. They are doctors of preventive medicine and make for health and vigor. They are free to all mankind, rich and poor alike. Summer holidays to be most beneficial should not be spent in visiting crowded cities, but in the woods, beside lakes, rivers and the sea, among the mountains—in a word, near to Nature's heart.

And no country in the world surpasses Canada as the ideal land for a summer vacation. People who can afford to do so, may flock to tropical countries during severe winter weather, or enjoy winter sports such as are provided in Switzerland and Eastern Canada, but for a most enjoyable and healthful invigorating summer holiday, no country surpasses and few can equal our own Dominion.

In the variety and beauty of its offerings, Nature was most prodigal in its treatment of Canada. Nor did she confine her gifts to any one Province or section of the Dominion, but with lavish hand distributed bounties on all. There is something to appeal to every taste and inclination of the human race.

Furthermore, probably in no other country can a vacation be enjoyed at less expense than in Canada. For a real holiday a person needs a complete change of scene and an entirely different environment to that in which ten or eleven workday months are spent. In many of the older and thickly populated lands this is difficult to obtain without travelling long distances and at a cost beyond the means of the average person. But in Canada a change is possible in a few hours journey with its great wealth of rivers, lakes, mountains, woods and seashores. Canada still remains a land of romance, a sportsman's paradise, with abundant nature beauty to inspire the poet, the artist, the lover of the wild. And these things are available to Canadians within the bounds of their respective Provinces.

But the dweller on the prairies of the West can at small expense obtain the greatest of all changes in his environment by spending his or her holiday in the Rockies, or journey a little further and bask among the beauties of Nature along the Pacific coast, or proceed eastward to the Great Lakes. People of Ontario and Quebec might with advantage take advantage of the service to a more united and understood Canada, take a holiday among the people of the other Province, while the holidaying citizens of these two Provinces and the Maritimes could with pleasure and profit interchange visits.

If Canada lacked in providing scenes of Nature's beauty, or if these spots were few and far between and therefore difficult and expensive of access, there would be some excuse for Canadians not holidaying at home and abroad; but more of their great Dominion, but, as already noted, this country takes second place to none as a place in which to enjoy Nature at its best, and in which to recuperate in mind and body, forget one's business worries and responsibilities, and restore one's mind and jangled nerves.

Canadians, of course, must not narrow, provincial people. They should know the world, and to know other countries and peoples it is necessary to travel. But half the enjoyment, and more than half of the advantages to be derived from foreign travel is found in first having the fullest possible knowledge of one's own country. "See Canada First" is, therefore, not only a telling slogan but good advice to all Canadians.

And while not disparaging the beauties and exhilaration of Canada's winter, it is none the less true that the summer vacation months offer the best time in which to visit all parts of the Dominion and learn of its beauties, its resources, its grandeur, its transcendent possibilities.

Purchases Exceed Sales

Russia Buys More From Great Britain Than She Sells

The council of the Russo-British Chamber of Commerce has published figures tending to show a steady increase in trade between Great Britain and Russia.

The growth is given as from £15,000,000 in 1922 to £58,000,000 in 1925. The report says Russian purchases from Great Britain slightly exceeded Russian sales in the British market. The latter consists almost entirely of foodstuffs and raw material, while the Russian purchases are largely machinery, tools, textiles and other manufactured goods.

The council points out that the entire business has been conducted on a credit basis and says it is not aware of any case in which the Russian organizations have failed to carry out their obligations.

Statistics enable a man to prove anything except the truth of the figures.

Bee Stings.

Minard's cures the pain and reduces the swelling caused by stings and insect bites. Keep it handy.

Better Gasoline Promised

May Mean Increased Efficiency and Economy in Automobile Operation

Increased efficiency and economy in automobile operation are forecast by government experts as the result of recent motor fuel studies by T. S. Slight, of the U.S. bureau of standards. The simplicity of the Slight test is claimed to make it possible for refinery supervisors, by an easy graduation of its under refinement, to produce without elaborate manipulation and increased expense, a "standard" gasoline meeting the specifications and giving the public more efficient, uniform, dependable gas without increase in price.

Recuperative Powers Of Fish

Frozen Solid By Liquid Air Will Revive in Water

An audience in New York was treated to the sight of an exhibition of the recuperative power of fish under injury by extreme cold. Professor Estabrook, of City College, transferred from a bowl of water into a jar of liquid air, two goldfish. Upon removing them from the jar, one was shattered into brittle fragments by a hammer. The other, returned to the water, soon swam about naturally.

Poland Not Leaving League
Reports in Geneva that Poland was considering withdrawing from the League of Nations unless her demand for a permanent seat in the League Council is satisfied, were denied by Auguste Zaleski, foreign minister.

Hindus Worship Midnight Sun

Pilgrimage Will Be Made To Norway Every Year

In the pale mystic rays of the midnight sun at North Cape, Norway, which juts out into the Arctic Ocean, as the northernmost point of Europe, a small party of high caste orthodox Hindus recently worshipped the midday through the symbol of the ever-shining sun which, to the Hindu believers, represents the physical glory of their deity, the spiritual sun.

The party of worshippers consisted of Rai Gopaladas, son of the Hon. Rai Ramdas Das of Lahore, British India, and Pandit Nagadish Chatterji, a high caste Brahmin, former director of Oriental research at Kashmir and once head of the ecclesiastical administration of the Gakkwar of Baroda.

It is the intention of the Hindus to arrange for a similar pilgrimage to North Cape each year.

Pain in the Back Yields to Nerviline

If you have failed to secure relief from other remedies, try one lot of good old "Nerviline," the strongest, most penetrating, pain reliever on the market. Nerviline acts quickly on the small pains and is the surest to drive out the big ones. It's a powerful and drop of Nerviline rub in, because it has the ability to sink in deeply that it drives away pain that other oils and liniments won't touch. Large 35c bottles at all dealers.

Are Commercially Valuable
A company with a capital of nearly a quarter of a million dollars has been formed for the purpose of catching sharks and exploiting them commercially. Sharks yield fish for boots and shoes, oil, meat, fertilizers, animal fodder, edible fins for the Chinese market, also, including shark fins, dye and polishing materials.

WEAK AND NERVOUS

A Condition Due to Watery Blood — Easily Corrected Through the Use of Dr. Williams' Pink Pills.

Thin, pale girls lack the power of resistance to disease that rich, red blood gives. Nervous breakdown is the result of this blood. So, in digestion, headache, backaches and many other troubles. Girls suffering from thin, impure blood need just the help of Dr. Williams' Pink Pills. For many years Dr. Williams' Pink Pills have been a world-famous blood-builder and nerve-restorer. This actually makes new, rich, red blood which imparts new vigor and life to all the organs of the body. The first effect is usually shown by a improved appetite; then the spirits revive and resistance at night gives way to health restoring sleep. For sufferers from nervous prostration, general weakness or physical exhaustion Dr. Williams' Pink Pills are a restorative of the utmost value. This is proved by the experience of Miss Sarah A. McEachern, R.R. No. 3, Bridge, N.S., who says: "About three years ago I became very weak and nervous. I had pains in my side and back. I also had frequent pains in the back of my head and neck. I was very pale and very weak. I had attacks of nervous irritability and at times I was so nervous that life seemed hardly worth living. While in this condition a friend strongly advised me to take Dr. Williams' Pink Pills. I began taking them at once and within two months with the result that there was such an improvement in my condition that friends would ask me what I was taking, and I was only too glad to tell them it was Dr. Williams' Pink Pills. I am now enjoying good health and am glad to give this statement for the benefit of those who may be suffering."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Will Attack Icebergs
Professor Barnes, of McGill University, has left Montreal for Newfoundland, where he will conduct experiments in attacking icebergs with thermite. Prof. Barnes, last winter worked with thermite on the Allegheny River blockade.

Find Magnificent Temple In East

Discovery In Indo-China Made By French School of Excavation

A magnificent temple, dating back to the early fourteenth century, has been discovered by the French School of Excavation, in the Far East, now working in Indo-China. The temple is described as the finest example of the art of that period yet seen, and the inscriptions upon it throw considerable light upon history.

Experts of the school have just reported to the Institute in France that the temple is near Angkor Thom, and that other buildings of the same age probably will be uncovered in the vast forests north of the present excavations. These forests will be explored this year.

Another remarkable discovery was reported to the Institute from the province of Tanh Hoas, Indo-China, where several Chinese tombs were unearthed, but not a single bone found. Precious objects in bronze and other metal were discovered.

Comparison By Total Tonnage

Only Way to Judge Naval Armaments Says France

France has proposed to the disarmament experts meeting at Geneva that the only way of comparing the naval armaments of the various countries is by total naval tonnage.

This raises the question of the effect of adoption of the French thesis would have on the Washington naval agreement.

The significance of the French-Italian initiative is that both countries seek liberty to strengthen their submarine and cruise forces which they deem more important to their national defence than battleships. Both United States and British delegates are opposing that the global tonnage concept will not interfere with the Washington accord. They believe that the ratios of capital ships established at Washington could remain the nucleus of such a tonnage programme.

Woman Will Attempt Flight Across Pole

French Actress Announces Intention To Try Trip This Summer

For years men have been seeking to locate the North Pole, and now the curiosity and itch for publicity has inspired a few of the other sex to dare the cold of the frozen lands. Miss Ida Rubinstein, a French actress, has announced her intention of flying across the pole this summer. In New York, another woman intends to gratify her craving for fresh experiences, and accompanying MacMillan's Polar party. Miss Maude B. Fisher, the aspirant for fame, is a graduate of Barnard College, and an athlete. "The quest for the unknown overhangs all fear," said Miss Fisher.

American Farmers Co-operative

Four States Form Latest Pool to Market Wheat

Thousands of farmers in Kansas, Oklahoma, Nebraska and Colorado will market their 1926 crop co-operatively this fall and winter.

State milling units in these states have combined their membership and resources into the Southwest Co-operative Wheat Growers' Association, which will act as the selling agency. The organization has taken over the sales equipment of the Kansas pool, which includes a 400,000-bushel terminal elevator in Leavenworth and another of 1,000,000 bushels at Kansas City.

It is planned to obtain control of wheat, store it in the terminal elevators and slowly feed it into the market.

Whether the corn be old or new grain, it must, yield to Holloway's Corn Remover.

Netted Small Fortune

Man Repaired Flap Poles In South Africa Preceding Visit of Prince Hubert Kirkland, a South African, found his profession of steeplejack at a discount when the Prince of Wales decided to visit South Africa in 1924. Kirkland asked the idea of touring the provinces according to the Prince's itinerary, repairing flagpoles, adjusting pulleys, threading new ropes and mending bunting. He kept a good three months' record of the Prince, returning to Durban with a small fortune and determined to make history.

He has now arrived in London from America after holidaying profitably and leisurely in Australia and New Zealand, the Pacific Islands, India, the Straits Settlements and Canada. Kirkland would only smile shrewdly when asked what his flagpole work netted him.

Even if the meek do inherit the earth in accordance with the ancient prophecy, they'll still have the traffic cops to contend with.

Minard's Liniment for Sore Feet

Fly-Flit-Flop!

FLIES breed in filth, feed on filth and bring filth into your home.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly. Get a Flit can and sprayer today.

"The yellow can with the black label"

Was Decorated For Gallantry

A Story of the War With An Amusing Element

In the debate in the British Commons on the abolition of the death penalty for army deserters in war time, Mr. R. Morrison told the following experience of a friend of his during the Great War: "While on outpost duty this friend was the sergeant in command of a party of four men who were cut off without food or ammunition. They eventually decided to try to find their way into the German lines. "On the way they came face to face with a German N.C.O. and six men. Both parties held up their hands simultaneously. The German N.C.O. was able to speak English and they discussed whether it would be safer for the Germans to surrender the British and for both to try to reach the British lines or vice-versa. "As the British artillery barrage was the more severe, they eventually decided to try to reach the British lines. They were successful, and Mr. Morrison concluded by announcing that his friend was eventually decorated for his gallantry in retaining his post and capturing a German N.C.O. and six men."

Somewhere in this story there is a moral—From "The Passing World," in the Free Press.

Miller's Fire Powders act mildly and without injury to the child, and there can be no doubt of their deadly action on worms. They have been in successful use for a long time and are recommended as a leading preparation for the purpose. They have increased their power in numberless cases and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

Judgment Creditor (at the Bow County Court): The defendant has a dying business.

Defendant: A dying business? I die, but it is dead.

Women's Empire Settlement

Canada's Supply of Educated Lady

The British Commonwealth Union, after a discussion of the position of women's empire settlement, have adopted a resolution calling on the Dominion Governments to employ an adequate number of women in salaried and voluntary positions in all schemes of migration.

J. Bruce Walker, director of European immigration for the Canadian Government, pointed out that, while there was no limit to the demand for women domestic servants in Canada, he did not advise educated women to go there with the object of entering professions, as Canada was already supplying her own needs so far as educated workers were concerned.

Dust Causes Asthma. Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. B. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

Plan Gas Attack Memorial
Survivors of the first gas attack by Germany on the Yser front, April 22, 1915, have taken steps that a monument be erected to those who were killed by the stifling fumes. The Duchess of Vendome heads a committee which has started the collection of funds for the monument.

"My client is not mentally normal. The fact that he murdered his wife is partly a proof of that, but the fact that he married again is conclusive."

Minard's Liniment for all pains

Of all the disagreeable fads known to mankind, the bill-collecting fad is about the worst.

Children Cry for

Fletcher's CASTORIA

MOTHER—Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep. To avoid imitations, always look for the signature of Dr. J. C. Fletcher. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

GOVERNMENT IS DEFEATED BY ONE VOTE ON MOTION

Ottawa.—After only three days of office, the Meighen Government was defeated in the house by one vote, on a formal motion challenging the right of the acting ministers of the Meighen Government to sit in the house, moved by Hon. J. A. Robb.

Progressive whip had voted with the Meighen Government in previous divisions sent it to defeat. Attendance in the house was comparatively slim, the government being in the negative.

There were 17 Progressives in the house for the division. Fourteen voted with the Liberals and three with the government.

The 14 who voted with the Liberals were: Miss MacPhail, Messrs. Coote, Brown, Garland (Dow River), King (North Huron), Jellic, Evans, Bird, Spencer, Gardiner, Braithwaite, Stedman, Millar, Porke.

The three Progressives who voted with the government were Messrs. Lucas, Boutillier and Pannier.

Four Progressives who in the last division voted with the government, now voted with the opposition and thus brought about the defeat of the government. The four were Messrs. Coote, Garland, Spencer and Gardiner.

This is the first occasion since Confederation that a government has been actually defeated in the house on a motion involving non-confidence. On three occasions, however, before resigning, the King Government found itself on the losing side in the house divisions.

Grain Act Amendment

Bill Is Discussed At Length In The Senate

Ottawa.—The bill to amend the Corn and Grain Act, known as the Campbell bill, continues along its tortuous way. This bill would give the wheat pool farmers the right to ship their grain through privately-owned country elevators.

During debate two amendments were proposed. One would provide that the bill will come into force on proclamation of the governor-in-council, and remain in force for a period not exceeding one year from the date of proclamation.

A second amendment which was proposed states:

"Any grain pool shall be empowered and is hereby empowered to purchase from any elevator company or more country elevators at which such pool has no elevator, and in case there are more elevators than one at such shipping point, and the owners of such elevators and such pools are unable to agree as to which elevator or elevators shall pool, the board shall decide which elevator shall be purchased by such pool; and in case the owner, or owners, of such elevators so decided upon and the pool are unable to agree as to price and terms for such elevator or elevators, then the price and terms shall be determined by arbitration under the provisions of any act relating to arbitration in force in the province wherein such elevator or elevators is situated."

New Red Lake

Strike Reported

Said To Be As Good As Yet Discovered

Toronto.—A special dispatch to the Toronto Star from Hudson, Ont., reports a big new strike at Red Lake.

The report states that this was flashed around the mining camp and that the find is on what is known as the Bill Smith group, a mile east of McKenna Island. Veins are said to have been uncovered as good as anything yet found at Red Lake or vicinity.

The Star says: "A number of average channel samples from this property assayed from 90 to 322 per ton for gold, with an equal quantity of silver."

Fenian Raid Veteran Dead

Ottawa.—Lieut-Colonel Archibald McLean, Fenian raid veteran, died at his residence, Westboro, aged 87 years. He was born at Penkington, Ont., the youngest son of Hugh McLean, who was a factor for the Hudson's Bay Company and a pioneer of the city of Winnipeg.

Miners Stand Pat

London.—The miners' executive committee, after reviewing the coal situation, determined to stand by their decision to resist any increase in hours or reduction in wages.

W. N. U. 1536

Predicts Industrial Activity For Canada

C.N.R. President Advises People To Stay In Dominion

Montreal.—"The United States sent a great railway man to Canada in the person of Lord Shagnessy who was one of the greatest empire builders, few men having done as much as he did for Canada. If I can make a slight approach to his work I shall not have lived in vain."

So declared Sir Henry Thornton, president of the Canadian National Railway, speaking at a banquet of the American Railway Association here.

Sir Henry made mention of the harmonious existence in Montreal of two great races, and also to the fact that the United States has had for many Canadians, drawn thither there by commercial advantages. He warned prospective emigrants, however, that "this would be the advantage if they stay at home and content to look ahead to the future in which looms the star of prosperity."

"Things are going to happen in Canada in the next ten years," he stated emphatically. "For Canada is on the threshold of great industrial activity."

Austria Confident Of Financial Prosperity

Country Has Had Hard Struggle Since Armistice

Vienna.—War in the Balkans will be the last thing Austria would want to see. We want nothing but to be left in peace. We have no racial minorities, we seek to recover no lost provinces. We only want to live and be useful."

One of the greatest Vienna bankers is speaking. He is cultured, peace-loving and of the old days of the dual monarchy when the banks of Vienna competed with London, Berlin, Paris, Frankfurt and Munich.

"Austria has struggled hard and she knows the result," he said. "We have had repeated setbacks and disasters, but we have come back to our task each time and always has been proven that there are no artificial obstacles to solvency and to success and prosperity."

"The depression followed us all through last year. Although our employment continues to increase, I believe that now we have reached our corner, although we face tremendous difficulties."

Bitter Verbal Clash

In British House

Labour M.P. and Secretary of Mines in Dispute

London.—Another turbulent scene in which Joseph Westwood, Labour member for Middleton and Peckham, threatened personal violence against Col. George Lane-Pox, secretary of mines, occurred in the House of Commons when debate was resumed on the government order which would permit coal miners to work eight hours a day instead of seven as at present.

Col. Lane-Pox stated that if he had said anything which seemed offensive he withdrew it.

He thought there had been misconception of what he had said.

Mr. Westwood had previously threatened to take a boot off and throw it at Col. Lane-Pox, "if I cannot get anything else."

The Labour member was deeply moved by a remark which he thought reflected on the courage of his men folk.

Find Ring In Grain Car

Lost Last Fall In Wheat Separator Near Findlater

Regina.—Some time last September on Ed. Dillabough's farm, out from Findlater, J. M. Robb, the Case Co. representative, lost a ring while examining the wheat in the separator.

The other day E. J. Topping received the following from J. M. Robb: "Dear Sir.—We are today in receipt of a wire from Mr. Graves at Port William advising that they found a Masonic ring in car No. 34519 which was shipped by you from Findlater. Do you know anything about it? If you do communicate direct with him at Port William, care of N. W. Patterson Co."

A few days later the ring was back to the owner.

Cow Breaks Milk Records

Montreal.—The Canadian Ayshire Breeders' Association announced that Nellie Osborne, of Elm Shade, owned by W. C. Wylie, Glen Elm, Howick, Que., has broken all former Ayshire records in milk and fat production, in an official test of 355 days, she produced 21,241 pounds of milk and 905 pounds butter fat, which far outdistances the production of any other cow of the breed.

Is Again Premier

Rt. Hon. Arthur Meighen, who has been called upon to form a new government at Ottawa.

Is Appointed Manager

E. G. Hingley Is the New Manager of the Saskatchewan Wheat Pool

Regina.—Appointment of E. G. Hingley, secretary-manager of the Saskatchewan Municipal Insurance Association, as manager of the Saskatchewan Wheat Pool, was officially announced following the re-organization of the Wheat Pool and Saskatchewan Co-operative Elevator Company's executives.

Donald MacIver, who has been joint manager of the Wheat Pool and the Pool Elevators Ltd., is appointed to the position of manager of the re-organized pool elevators, while R. G. Low, treasurer of the Saskatchewan Co-operative Elevator Company, has been named as the new secretary of the Wheat Pool in succession to J. D. Reed who takes over the treasury of the Saskatchewan Pool Elevators Ltd.

A TEMPORARY CABINET FOR NEW GOVERNMENT

Ottawa.—Acceptance by Right Hon. Arthur Meighen of the post of prime minister, formation by him of a temporary ministry composed of seven members without portfolio, and the decision to proceed with the work of the session until it is completed, were the outstanding features of a statement made in the house by Sir Henry Drayton.

From the treasury benches to the right of the speaker, Sir Henry read his statement to the crowded house and galleries. The announcement of the temporary appointments was received with some jeers by the Liberal opposition, while Conservative cheers answered them. The ministers who will constitute the temporary ministry were:

Sir Henry Drayton, finance department and railways department.

Hon. R. J. Manion, department of health, soldiers' civil re-establishment, post office, immigration and labour.

Sir George Pretye, department of secretary of state and public works.

Hon. H. H. Stevens, customs, interior, Indian affairs, agriculture, trade and commerce.

Hon. Hugh Guthrie, justice, national defence.

Hon. W. A. Black, department of marine and fisheries.

Mr. Meighen assures the portfolios of secretary of state for external affairs and president of the privy council.

Sir George Pretye, the statement said, will have charge of matters affecting these departments during Mr. Meighen's absence from the house.

To Carry Canada's Products Abroad

The new freighter S.S. "Calneak," just launched at Sunderland, England, is one of the two new sister vessels specially designed for the Calne-Thomson service between the northern coast of Great Britain and Canada.

The "Calneak" is a most important function of this service. The "Calneak's" equipment embodies the most modern facilities for refrigeration, ventilation and carriage of perishable goods.

FARMERS' PARTY OF ALBERTA TO REMAIN IN POWER

Calgary.—Premier J. R. Brown has been returned to power as the head of the United Farmers of Alberta. He will have an undiminished majority in the legislature. Liberals will probably retain the numerical strength.

The Conservative party made a gain of three seats. Two Labor members, and possibly a third, pledged to support the government, were elected.

Additional returns came slowly to day and tonight due to the arduous task of counting the preferences under the proportional representation system. In quite a few cases several days will elapse before elections can be definitely decided.

Liberal suffered because of the Conservative vote in Calgary, returning but one member compared to two from the city in the last election. Hon. Alex. Ross, minister of public works, labor candidate, was defeated and the Labor vote generally was small.

Constituents represented by U.F.A. members in the fifth legislature returned their representatives as a general rule. In Beaver River and Edmonton the party gained members and in the two new seats, Empress and Cypress, added since the 1921 provincial election, farmer candidates were returned.

Would Colonize Russia

American Jews Give Ukraine Preference Over Palestine

Riga, Latvia.—A large majority of American Jews are in favor of the American Government recognizing Soviet Russia, according to Dr. Joseph Rosen, director of the American Joint Distribution Committee, which has collected \$20,000,000 in the United States to colonize Jews on farm land in the Ukraine.

In an interview published in the Leningrad Krasny Gazette, Dr. Rosen says only a few Jewish social and political groups, such as the Jewish Labor Vorwarts and a few of the Jewish labor unions oppose recognition.

The American Jews, continues Dr. Rosen, has decided it is better to assist the Russian plan for colonizing Jews in the Kherson district, avoiding future pogroms, instead of helping Palestine at present. Of the 3,000,000 Jews in Russia he estimates that more than 1,000,000 are unable to exist a living, so the colonization plan was voted preference over the Palestine project by a meeting of the American Jews in New York.

Young Englishmen

Coming To Canada

Have Taken Six Months Training In Agricultural Work

London.—Fifty-six single young men who have undergone six months training in agricultural work at the ministry of labor's training centers at Brandon and Clayton in Suffolk, left for Canada on the Express of France. They will proceed to Winnipeg where they will be placed on selected farms.

Planned To Shoot Mussolini

Rome.—Thio Zaniboni, former Socialist leader, has confessed that he planned to shoot Premier Mussolini according to a report of the attorney-general's investigation of the case, made public here. Zaniboni was arrested October 4 last, armed with a rifle, in an hotel room overlooking the balcony of the Chigi Palace from which the premier was to deliver an address.

The country of Thibet is reported to have only one motor vehicle, which is a motorcycle.

Rural Credits Bill

Has Passed Senate With A Few Amendments

Ottawa.—Rural credits passed the senate with amendments. The measure which recently passed the commons, sponsored by the Mackenzie King Government, now goes back to the commons for the concurrence of that chamber in the amendments which the upper chamber has made in it.

The two principal changes made were the removal of the limitation of one per cent for expenses and leaving the amount in the judgement of the board, and placing responsibility for all expenses incurred in a province on the province in which they were incurred.

Senator W. D. Ross, Conservative leader, had moved at an earlier stage that "the act should not come into force until the majority of the provincial legislatures had by legislative enactments identified their intention of participating in this scheme."

He said the bill was not needed, as the provinces which had already rural credits were making profits.

Senator Schaffar said that to make it compulsory to have five provinces in the scheme before it became operative was a good way to kill it.

Senators Handford and Willoughby opposed the amendment. The bill was for all Canada while it was primarily to help western farmers. The time might come when the east would need such a law.

Senator Hughes spoke in favor of the bill. It carried out a duty the east owed to the west.

Weather Prediction

Not Fulfilled

"Summerless" Forecasters All Wrong Says Sir Frederick Stupart

Toronto.—Predictions that 1926 in which was a "summerless year" have so far not been fulfilled. This prediction was made by H. J. Brown, an expert on the subject of weather, last April.

April was unusually cold, but May was somewhat above the average temperature. June is a little colder than the average, but not much. This information was given by Sir Frederick Stupart, director of the Dominion Observatory here, and weather forecaster for the Dominion.

Sir Frederick was not worried about the report that this would be a "summer year." "I put little faith in weather prophecies for long periods ahead," he said. "We have not the knowledge to determine such events in the future."

British Comment

London Times On The Resignation of the King Government

LONDON.—The London Times, commenting on the result of the resignation of the King Government in Canada, stated that the agitated debate at Ottawa on a purely domestic issue revealed the inherent weakness of the government, which could never count on a solid party majority, but was dependent on vague affinities with a dissident group whose own prospects were obscure.

The Times continues that "it is not necessary to analyze the nature of the charges or attempts to assess the losses said to have been caused by the Canadian business community generally, by the alleged extensive smuggling."

FOR CLEAN-UP OF CUSTOMS FROM COAST TO COAST

Ottawa.—The farmers party stands for a complete clean-up of the customs from coast to coast," said Miss Agnes McPhail to the Canadian Press after the Progressive party caucus.

"The present inquiry has been confined to only two ports and has scratched the surface. It must be extended from coast to coast and be complete, without fear or favor, and irrespective of where the chips fall. There should be a judicial inquiry and this should represent all groups in the house—that is to say, one judge should be nominated by the Liberals, one by the Conservatives and one by the Independent groups. This commission should proceed to work immediately after adjournment of parliament and parliament should not meet again until the report is complete, whether it takes six or eight months. Then parliament will be in a position to consider the whole question on its merits; there will be no sheltering of the issue, to whatever party it may belong. The general result will be a clean-up of political life in Canada of lasting benefit."

MEIGHEN DEFENDS THE ACTION OF GOV. GENERAL

Ottawa.—Declaring that "the attack promulgated by, or under the direction of, the late prime minister ought not to pass unnoticed," Right Hon. Arthur Meighen, prime minister, issued early this morning a statement, defending the action of His Excellency the Governor-General in refusing dissolution to Right Hon. W. L. Mackenzie King, now opposition leader.

Mr. Meighen states that when a prime minister, having asked and obtained dissolution, but failing to obtain a majority, continues in office, he is not entitled to demand a second dissolution merely because he is unable to command a majority in the House of Commons. "More emphatically it is true that in the class of cases stated above, if not indeed in any case whatsoever, a government is not entitled to dissolution while a motion of confidence against that government is under discussion in the house," he proceeds. "A dissolution very manifestly should not be granted when its effect is to avoid a vote of censure. This was precisely the case in the present instance."

The text of the statement follows: "While it is highly undesirable that a controversy should arise with regard to the conduct of the governor-general in respect to a matter upon which his duty compelled him to give a decision according to his best judgment, yet the attacks promulgated by, or under the direction of, the late prime minister ought not to pass unnoticed. A reasonable consideration of the fact that his excellency, by virtue of his office, can himself make no defence, warrants surely a word on his behalf."

"There are several classes of cases in which the crown must exercise discretion in granting or refusing the request of a prime minister asking for dissolution. It is indisputable that in such a case a prime minister continuing in office is not entitled, during the ordinary course of parliament, to demand a second dissolution merely on the ground that he is unable to command a majority in the House of Commons. This principle is of a special force in the early stages of a new parliament."

Great Damage Is Caused By Earthquake

Most of Countries Bordering On Eastern Mediterranean Effected

LONDON.—A big earthquake which embraced Italy and most of the countries bordering on the Eastern Mediterranean, was much more widespread than first reports indicated. It extended as far as the East Indies, heavy shocks being experienced at Singapore and Central Sumatra.

Thus far the reports do not indicate any serious casualties in Crete, which appears to have been the centre of the disturbance, nobody was killed and only a few were injured.

Advices received from Rome indicate that the island of Rhodes, which is under Italian sovereignty, suffered very heavy shocks, numerous villages being partially wrecked, and thousands of small houses, raised, but even the loss of life or injury to the inhabitants seems to have been slight.

Latest advices from Crete confirm that the damage to the archaeological museum at Candia, was extremely serious, among the many antiquities destroyed being a mural painting depicting a bull fight at the Minoc Court.

Blaze At Swift Current

Heavy Loss

Swift Current.—Fire starting in the hardware department of W. W. Cooper department store, caused a loss, estimated at \$300,000, covered by insurance, and for a time threatened to destroy the business section of the city.

One building, the Cooper Block, in a state of ruin, and the adjoining structure, known as the Berth Block, is badly damaged, one storey being destroyed, while many glass windows across the street were broken. Following a hectic four-hour fight by firemen, the blaze was brought under control.

Victoria, B.C.—There will be no export consignment of Northern British Columbia fisheries this year, according to word received at the provincial fisheries department from federal officials.

Personal and Local

Mr. J. C. Cox met with a severe accident in the mine on Thursday last when he received a severe cut across the nose and face necessitating several stitches being inserted. He is reported to be progressing favorably.

Mr. R. G. Powell, principal of the Coleman schools, left Thursday night for Edmonton, where he will assist in marking examination papers during the next few weeks.

Dr. J. R. Ross, of Drumheller, a former resident of Coleman, spent the week end in town last week on his way back from a vacation spent at the Coast.

The Town Band will give a concert in the Park on Sunday evening commencing at 8 o'clock.

Capt. C. Watt and Lt. R. Webster of The Salvation Army, have arrived in Coleman to take charge of the work in Coleman and surrounding district. We are yours for God and Coleman.

Capt. Watt, C. O.

Martin Perazak of Bellevue lost his life on Thursday afternoon of last week when he jumped from an auto in which he was riding when approaching the railway crossing at Frank. The other occupants of the car were unhurt although the front part of the auto was badly damaged by coming in contact with a freight engine. Perazak leaves a widow and four children. The funeral was held Sunday last at Bellevue, where deceased had resided for some fifteen years.

The Southwestern Coal, Oil & Gas Co., who have a large acreage of mining rights at Lundbreck, are now going ahead to develop their property. They are opening up a new 140 foot vein of coal and have recently secured a large order for coal. This company has also commenced operations to drill for oil.

I.O.O.F. ELECT OFFICERS.

The election of officers for the ensuing term of the Coleman Lodge of Oddfellows held at their last regular meeting on Monday of this week, resulted as follows:—

P. N. G., Bro. H. Olson.
N. G., Bro. Harry W. Clark.
V. G., Bro. I. Neilson.
Rec.-Sec., Bro. Van Marjoun.
Gen. Sec., Bro. Vincent.

TOURNAMENT NOTES

Trophies have been provided for all the senior events except the mixed doubles and it is expected that this will be filled soon. The Fernie club has offered to provide individual cups for this year's winners, following the custom established in the other events. Each winner receives a small replica of the trophy won.

The mixed doubles provided some of the most strenuous tennis of the tournament and the steadiness of the lady members of the teams was remarkable.

The finals of the men's doubles had to be called on account of darkness with Barnes and McLeod having won two sets from Watts and McLean while the latter had won one. The former win by default as their opponents cannot remain to finish the match. It is regrettable that this should be so, as these four players put up a great exhibition of tennis.

All roads led to Windsor Station, Montreal, three days prior to the opening of the tenth annual international Kiwanis convention, which opened on June 6. Not only was the C.P.R. station the gateway through which an army of Kiwanians passed into Montreal, but, every one of the delegates, their wives and friends, about 7,000 in all, congregated there as the station had been constituted a registration headquarters of the convention. A force of 32 stenographers was specially engaged to handle the work.

Ladies Social at Bellevue

The members of Bellevue Church Ladies Aid spent a very enjoyable evening on Monday, June 28th, to mark the departure of one of their members (Mrs. Nash), who is leaving to make her home in Macleod.

It appears that Mrs. Nash was a former resident of that town, and will return there satisfied with her stay at Bellevue, and all good thoughts for her neighbors. Likewise will her friends in Bellevue miss her co-operation in social affairs.

Mrs. Key and Mrs. Pattin were also wished a safe and pleasant journey on their leaving for an extended holiday. Mrs. Key will visit her home in Ontario, and Mrs. Pattin will reside for some time at her ranch at Lundbreck.

The evening was spent in games and music, after which a dainty lunch was served, followed with ice cream. Later Mrs. Nash was presented with a silver Casserole showing the high esteem in which she was held by the above Aid, and to which she responded in a very able manner. An enjoyable evening was brought to a close with the singing of Auld Lang Syne, and wishing those about to depart every prosperity.

A fourteen-car special Canadian Pacific Railway train carried more than a hundred of the most prominent representatives of banking and financial interests of New York City and State to Quebec, where they held their 33rd annual convention of the New York State Bankers' Association at the Chateau Frontenac recently. Included in the party was Col. J. W. McIntosh, Comptroller of Currency, Washington; and W. J. Donovan, Assistant Attorney-General of the U.S., and several financial specialists of New York's leading newspapers.

While Canadian Pacific train No. 87 was standing on public crossing preparatory to taking passing track, an automobile, occupied by four persons, ran into the side of the train, badly damaging the auto. In another case, a driver said he saw the train and heard the whistle signals sounded, but too late to avoid running into the side of the engine. Yet again, a touring car, travelling about 25 miles per hour, ran through the crossing barriers at a public crossing in Montreal but did not stop. No injuries were reported in all three incidents.

Representing capital running into billions of dollars, a party of around eighty prominent bankers, financiers and men representing commercial and business interests, recently arrived at the Windsor Street Station, Montreal, from New York, and made a tour of the pulp and paper industries and the new aluminum districts of the St. Maurice and Saguenay Valleys in Quebec Province, with a view to personal inspection of the prospects in these great developments. The party was accommodated with five twelve-section compartments and drawing room sleepers, two dining cars and the private car "Montmorency," the whole being C.P.R. equipment.

Here and There

Stormont, the best mine in Nova Scotia, when gold-mining in the province was an industry, is to be re-opened. Units it closed down, twelve years ago, Stormont mine had produced over 575,000 tons of ore, giving an average of free gold of \$4.13 per ton, or \$2,225,000 during its activity.

A record single shipment of Indian motor-cycles, consisting of 85 cases, from Amory, Mass., recently arrived in Tokyo, Japan, having come forward by Canadian Pacific Rail and steamer lines. The demand for motor-cycles in Japan is a steadily increasing one, being a cheap and convenient method of locomotion and well suited to the somewhat narrow roads of that country.

Twenty-one British Rotarians recently came over to Canada on the Canadian Pacific liner "Montclair" en route to the International Rotary convention at Denver. On their return trip they came back through Canada, travelling to Winnipeg and Fort William, and taking the Great Lakes trip on C.P.R. steamboat to Port McNicoll. They returned to the Old Country by the C.P. liner "Montcalm."

The Canadian Pacific Railway has just added two of the new Mount Class observation cars to those running out of Montreal. Five more are just about ready to run and the balance of four cars will be ready for service shortly after those. They are all steel cars, made up of three compartments, and one drawing room with a parlor room and observation platform. They will be a feature of long-run trains on the C.P.R.

The English football team now touring Canada had one of the most strenuous work-outs in the history of any athletic side. They had a week-end at the Chateau Lake Louise they had a practise at an altitude of a mile and a half above sea level, where the thinness and dryness of the air had a wonderful effect upon them. Their captain thought it remarkable that prize-fighters in training had not utilized the marvellous properties of this training camp.

A fourteen-car special Canadian Pacific Railway train carried more than a hundred of the most prominent representatives of banking and financial interests of New York City and State to Quebec, where they held their 33rd annual convention of the New York State Bankers' Association at the Chateau Frontenac recently. Included in the party was Col. J. W. McIntosh, Comptroller of Currency, Washington; and W. J. Donovan, Assistant Attorney-General of the U.S., and several financial specialists of New York's leading newspapers.

The party was accommodated with five twelve-section compartments and drawing room sleepers, two dining cars and the private car "Montmorency," the whole being C.P.R. equipment.

On his return from a recent tour of inspection of the Company's Western Lines, Grant Hall, Vice-President of the Canadian Pacific Railway, stated that exports to the Orient in the form of grain, flour, dressed meats and motor cars were steadily increasing in volume and that trade with Australia had been considerably stimulated by the trade arrangements with that Dominion. Mr. Hall added that conditions were good in the West. The mining industry in British Columbia showed up well, while lumber shipments were heavier than last year.

Canada Occupies Foremost Place In Seed Improvement And In Handling Registered Seed

Canada produced a considerably larger quantity of registered seed of the principal farm plants in 1925 than in any previous year, according to a report just issued by Mr. Peter Stewart, secretary of the Canadian Seed Growers' Association. It grew 40,000 bushels more registered seed wheat last year than in 1921, eight thousand bushels more of new barley and seven thousand bushels more of registered sweet clover seed. Increased production and ready sales of such seed, according to Mr. Stewart, indicates a growing appreciation of its qualities by farmers in Canada and in other countries.

A great deal of attention is given in this country to the provision of good seed for the farmers. Plant breeding is carried on by experts at agricultural colleges and experimental stations maintained by the Dominion and Provincial Governments. It is also practiced by a number of individual growers who, according to Mr. L. H. Newman, the Dominion cerealist, have contributed very materially to the improvement of the varieties of cereals and other farm plants in Canada. The object of the plant breeding operations is to evolve varieties of grains, vegetables and fruits that are suitable for cultivation under particular conditions of climate and soil, and that will measure up to certain standards of quality and quantity of yield. For example, cross-breeding of various strains of wheat has been proceeding in the field of cereals at Dominion experimental farms to furnish varieties that will stand a certain degree of frost and survive a certain period of drought, that will produce a large yield of grain of good milling and baking quality. As every one in Canada knows, this cross-breeding of wheat has had results of great value to the farmers and the country at large. Allied with the expert who evolves new varieties of plants are growers who multiply the seed of those varieties and supply it to the farmers. Many of these men whose business is to furnish good seed for the farmers are members of the Canadian Seed Growers' Association, and its kindred organizations established in a number of the provinces. These men work of great importance to agriculture in the Dominion.

Mr. L. H. Newman, the Dominion cerealist, has said that "among the nations of the world, Canada occupies a foremost place in regard to its organization both for systematic seed improvement and for the handling of high-class seed in commercial quantities under efficient control." There are indications that that fact is realized outside the Dominion. Marquis wheat, originally evolved in Canada, is grown throughout a large part of the hard wheat area of the United States. Last year, a big shipment of Canadian registered seed wheat was shipped to Argentina to be planted by farmers there. Last year, too, the secretary of the Canadian Seed Growers' Association says, practically all of the supply of winter-grown Canadian registered alfalfa seed was bought up by farmers of the middle-west section of the United States, who paid a considerable premium over the price of home-grown alfalfa seed plus a customs duty of four cents a pound.—The Mail and Empire.

Dairy Industry Expanding

In Few Years Manitoba Has Built Up Wonderful Business

Manitoba's dairy industry continues to expand. Starting with almost nothing 20 years ago, the provincial dairy production of 1925 reached nearly \$11,000,000. The province won 44 per cent. of butter first prizes in 1925 and 31 per cent. of the total dairy prizes. The first export of butter was made in 1912 with 25 carloads. Last year it was 215 exported to Eastern Canada and the British Isles.

Planting

A seed company received from one man fifteen applications for free samples of their pea seeds, and when the sixteenth request arrived the manager decided it was time he did something. "Dear Sir: I am sending you the seeds as requested; but what are you doing with our seeds? Are you planting your whole suburb with peas?"

One day later he received a reply.

Bright Outlook

Hushand can't understand why wife ever complains about anything when she has his coming home in the evening to look forward to.

Immigration To Canada

Good Percentage of Settlers Coming From Britain and United States. A sharp increase in immigration to Canada in April, 1925, over April, 1924, is shown in an official statement recently issued by the Canadian Government department of immigration and colonization. The total immigration for April amounted to 17,923 compared with 10,984 for April a year ago. In April, British immigration amounted to 7,897; immigration from the United States 2,967, and from other countries 7,059.

Of the total immigration in April, 11,925 belonged to the farming class, 760 were laborers, and 1,413 female domestic servants. A total of 5,918 Canadians were recorded as returning from the United States in April after having entered that country with the intention of remaining there permanently and who now declare their intention of permanently residing in Canada.

Alberta's Striking Growth

Sunshine Province Shows Remarkable Progress in Last Twenty Years. Alberta's progress during the period of twenty years is a striking evidence of the growth of the west, and especially of the Sunshine Province, as follows: Agricultural production from \$20,000,000 to \$25,000,000. Wheat production from 2 millions to 105 million bushels. Area of all crops from 61,000 to 199,000 acres. Dairy products from 1,000,000 to 23,000,000. Coal production from \$21,000 to 5,800,000. Manufactures from nearly \$500,000 to \$5,137,389. 1,000 miles of railway have been increased to 4,800 and population from 200,000 to 610,000.

More Money In Butter

Cream Yields a Little But Butter Is Better. Recently Mrs. Alice Bailey, of Rocelle, Man., received the returns from four gallons of fresh cream she had previously shipped to a local dairy company. The cheque was for \$2.52. For an experiment, immediately on receipt of the cheque she made sixteen pounds of butter with four gallons of cream. She sold the butter at 40c a pound, or a total of \$6.40. She made, thus \$3.88 more with the same amount of cream.

Cultivation Of Corn

Cultivation Should Begin As Soon As The Corn Is Planted. Last year in Southern Saskatchewan approximately seventy thousand acres of corn were grown, states W. H. Gibson, superintendent of Indian Head experimental farm, in a circular just issued, and corn is rapidly developing into one of the most important forage crops. Corn is also recommended as a valuable summerfallow substitute, and when compared with other crops in Indian Head in this respect corn had given higher yields, the succeeding year than any other crop.

Corn used as a summerfallow substitute is usually sown with a corn planter in check rows to assist in the cultivating of it, but where one has no planter very good success may be had by sowing with the ordinary grain drill. Cultivation should begin as soon as the corn is planted and continued until it is about six inches high. Harrow every week over this period and millions of small weeds will be destroyed and little if any damage done to the corn. After the corn is too high for harrowing, a cultivator must be used, either the regular corn cultivator or the small garden one will do if the area is small. Take care not to run the implement too deep as the corn roots are shallow and will be injured. Cultivation should be continued until the corn shades the ground well, which will be when it is from three to three and a half feet high. Corn in an intertilled crop controls weeds, reduces the cost of growing grain crops, and provides abundant food for livestock production.

Safeguarding the Forests

Smoking In National Forests of Montana Strictly Forbidden. All smoking has been forbidden in the Kootenai national forest, Montana, as a safeguard against forest fires which recently have been increasing. If this regulation appears drastic it might be well to remember that the forest service has been trying for years to educate us not to be careless with fire in the woods, and apparently we have as yet not learned this first lesson in woodcraft.—Buffalo Courier and Express.

Trunkwood is so durable that beams 200 years old are still strong.

New Vessel Is Charters By Government For Annual Patrol Of Arctic Archipelago

Canada's Wheat Production

Will Reach Billion Bushels Annually Within Ten Years Is Prediction. For five years Canadian wheat crops have averaged two bushels an acre more than those of the United States, says a bulletin issued by the International Institute of Agriculture. The Dominion's world record of production has averaged 15.5 bushels per acre since 1920, while that of the United States has been 13.2.

The five-year average for the other principal wheat growing countries is: Argentina 13.3 bushels, British India 11.5, Australia 11.7. The bulletin predicts that within 10 years, with the settlement of the Dominion's vast western agricultural lands, Canada's wheat production will reach a billion bushels annually.

New Paving Material

Experiments Now Being Made With Chips and Sawdust. Sawdust and wood chips are among the paving materials with which experiments are being made, says "Science Siftings." The wood is first treated with creosote, and then submitted to pressure, and tests already made are said to have given a floor suitable for medium traffic from a mixture nine parts of sawdust to one of Portland cement. In German experiments, great adhesiveness for cement concrete is reported to have followed giving the wood or sawdust a preliminary washing with curd soap and water, and then with a thin solution of silicate of soda.

Johnnie, when asked by his people to define "defect," said: "A defect is what you've got when you haven't as much as if you had just nothing!"

"Have you wondered about your husband's past?"

"Dear me, no! I have all I can do taking care of his present and worrying about his future."

Choice of Dominion Capital To Be Celebrated

1. Entrance to Rideau Canal at Ottawa River before fire destroyed Parliament Buildings. 2. Old entrance to Rideau Canal—Parliament Hill, as it looked 100 years ago, in 1826. From painting by Cecil at time of opening of Canal, 1826.

In the last summer of 1826, Lieutenant Colonel John By, of the Royal Engineers, selected the spot where the Rideau Canal should enter the Ottawa River, and in so doing settled the site what afterwards became the capital of the Dominion of Canada. The centenary of this event is being marked this coming August, by a celebration which is expected to be national in character. The Dominion Government has already indicated its intention of not only taking part, but of signaling the occasion by extension of its works for the beautification of the capital. The celebration itself will include historical pageantry and will draw from the western plains a spectacular "Rampade" an illustrative of one of the historical phases of the development of that broad section of the Dominion.

In making his journey up the Ottawa, Colonel By was not planning for the capital of a Dominion, but striving to strengthen the defenses of one of the outposts of the British empire. "During the war of 1812," says Hannett P. Hill, in a brief history of the construction of the Rideau Canal, "the British authorities experienced much difficulty in attempting the defense of the western part of the province. This was owing to the difficulty of transporting men and supplies from Montreal to Kingston, because of the rapids on the St. Lawrence River. They were also faced with the danger of a U. S. army blocking progress for the canal route. The cost of transport from Montreal to Kingston was also excessive, being fifty-four shillings per cent.

The coming of railways has superseded it and rendered it practically useless as a carrier of traffic; but it rendered valuable service in earlier days for the settlement of the province of Ontario, both east and west. Three years after Bytown became Ottawa, it was chosen as the capital of the old province of Canada.

The centenary celebration this summer will last two weeks, from August 16 to 28. The first week—August 16 to 21—will be devoted particularly to the centenary programme, which will include an historical pageant illustrating outstanding periods and events in the history of the capital. During the same period the Edmonton Stampede will give a daily programme, while the arrangements are also being made for holding the Rudder International Power Boat races for two days of this week. Plans are not fully completed for the celebration, but among other proposals under consideration are the erection of a monument to Colonel By. The Dominion Government is also preparing plans for the extension of the Rideau, which is such an attractive feature of the city.

Preparations for the 1926 patrol of Canada's Arctic Archipelago are being made by the North West Territories and Yukon branch of the department of the Interior, and it is expected that the annual expedition will sail about July 19. This year's patrol to the far northern posts will be made in the SS. Beothic, a sailing vessel of 2,700 tons capacity, with a speed of ten knots. This ship was chartered for the trip from John Seton Fisheries Company, Limited, of St. John's, Newfoundland, to replace the C.G.S. Arctic, which is being retired from service. For the purpose for which she was built, which was to winter in the north in safety to herself and comfort to her crew, the Arctic could hardly be surpassed. She is past her prime, however, and with the gradual increase in the number of posts and the consequent heavier demands on ship accommodation a larger and speedier boat is required. The Arctic, certain accessories having been replaced, has been turned over to the government salvage officer for disposal.

The Beothic, which has a greater speed and carrying capacity than the Arctic, was recommissioned last November at Newcastle-on-Tyne, England, for the seal fisheries. She was classed, for ice work at L'Anse-au-Loup in her initial trip to the seal fisheries this year performing speedily, returning with a record catch of 48,000 skins. This year's expedition will sail from North Sydney, Nova Scotia, instead of Quebec. The posts already established will be visited and an effort made to complete the establishment of the new post at Rache Peninsula on Ellesmere Island, in latitude 75 deg. north. Owing to ice conditions last year the materials and supplies for this proposed post had to be left at Fram Harb, about fifteen miles south of Rache Peninsula. This summer the Beothic will pick up these supplies and at length the passage of Rache Strait and the crossing of Buchanan Bay to the side of the proposed post. On the return journey, if time and conditions permit, the Beothic will also cruise up either Lancaster Sound or Jones Sound. The ship is expected to return in late September or early October.

Mr. George P. Mackenzie will again be the officer in charge. One of the conditions of the charter party is that the crew of the Beothic will be retained. Captain Falk, its present commander, who has had considerable experience in the navigation of Hudson and Baffin Bays and adjacent waters, will command the vessel. About ten members of the Royal Canadian Mounted Police will be taken north to relieve those coming out.—Dr. L. J. Weeks, who accompanied last year's expedition as geologist, will also be included in this year's personnel. He, together with an assistant, Mr. Maurice Haycock, will establish a base at Pangnirtung, on Cumberland Sound. They will remain in the north until October, 1927, and during that time will gather geological and geographical information on the interior of Baffin Island. The other members of the expedition will be announced later.

Mr. George P. Mackenzie will again be the officer in charge. One of the conditions of the charter party is that the crew of the Beothic will be retained. The other members of the expedition will be announced later.

Saskatchewan Dairy Industry

Eleven New Creamery Plants Have Been Established This Year

Establishment of 11 new creamery plants in Saskatchewan to date this year in addition to replacements of old creameries sets a record not equaled since the dairy industry started in the province. New manufacturing plants have been opened at Regina, Moose Jaw, C. Swift Current, Melville, Young, Parkdale, Speers and Kelvington.

P. E. Reed, dairy commissioner for Saskatchewan, stated that there was room for debate as to whether such a big increase in the number of creamery manufacturing plants was altogether justified by the volume of production, but if production was stimulated sufficiently to take care of the added overhead the industry as a whole would be benefited.

John Bull and France

Not only is it unfair that a heavy subsidy in relief of the French taxpayer should continue to be paid by British taxpayers in the form of interest on the French debt; it is also most unreasonable that at a time when France makes such a large claim on our financial assistance, she should refuse to contribute her share of the cost of a tariff which already was exceptionally high.—London Chronicle.

After marriage some women are as anxious about their looks as men are about their souls.

Don't envy your neighbor's luck; envy his pluck, if anything.

WORLD HAPPENINGS
BRIEFLY TOLD

Miss Catherine Jellicoe, an aunt of the Earl of Jellicoe, died at Southampton, June 27. She would have been 125 within a few weeks.

Col. M. LeClerc, 87, Fenian Road veteran, whose father was a factor for the Hudson's Bay Company in Western Canada, is dead.

Saskatchewan's bee population has been increased this year by a big influx of imported bees from various points in the Southern States and also Manitoba apiaries.

The King and Queen opened a new wing of the Tate Picture Gallery at Westminster, including a special gallery housing 200 oil paintings, water colors and sketches of the late John Sargent.

Pickets enforcing the anti-British strike and boycott against Hong Kong killed five persons and wounded another when they fired into a group of Chinese about to board a vessel for Hong Kong.

Exile to the Marila Islands has been decreed by the Mexican Government as the penalty for illegal sale of narcotics.

Proprietors of stores caught selling drugs illegally, will be forbidden to operate drug stores in Mexico again.

League of Nations officials insist that the resignation of several or any of the small powers will not seriously affect the league's influence, and that only if a great power like Great Britain or France resigns would the league be really in peril.

Labor leaders in Harbin, Manchuria, are collecting \$20,000 to be sent to England to aid striking British miners. Members of professional unions are required to subscribe one per cent. of their monthly wages to make up the \$20,000 quota.

The League of Nations' commission of experts on reform of the calendar has decided to recommend that the second Sunday in April be the fixed date for Easter. The decision is subject to an agreement with the Holy See, which was not represented at the last meeting of the commission.

Capsules That Combat Disease

Important Discovery Made By Professor at Pasteur Institute
A sensational discovery, which it is claimed may possibly revolutionize medical science, is made public by M. Beredka, the successor of Professor Metchnikoff, at the Pasteur Institute in Paris.

It is declared that by swallowing capsules containing a virus, the walls of the stomach are immediately vaccinated. It is believed that this method of fighting such diseases as typhoid is much more efficacious than injections.

Among other diseases which it is claimed may be combated by swallowing various capsules are pleurisy, lymphitis, anthrax and porphyria. The fundamental idea of the treatment is that there should be a virus for each particular organ of the body which would be affected by the contraction of a disease.

M. Beredka makes the walls of the stomach susceptible to the virus by using a small quantity of ox bile.

Dedicate Window In Westminster Abbey

In Memory of British War Prisoners Who Died in Germany

A beautiful window in the north side of the nave of Westminster Abbey, which was donated by James W. Gerard, former United States ambassador in Berlin, in memory of British prisoners of war who died in Germany, was dedicated in London in the ceremony was performed by Dr. Fowler Norris, dean of Westminster. Mr. Gerard was represented by Alanon B. Houghton, the American ambassador to London, and many other Americans were present.

Hadn't His Shirt

Because he didn't happen to have a bolted shirt ready, the professor of chemistry who was elected president of Poland asked to have his inauguration ceremonies postponed. That's an appropriate start for the head of a "half democratic government." It reminds one of Theodore Roosevelt when he made president of the United States—Grove Patterson in Duluth Herald.

Many districts in Java are permeated with petroleum. In places, if a handful of earth is taken up and squeezed, a stream of oil may be forced from it.

It's all right to make some things go as far as possible, but it isn't policy to stretch the truth.

W. N. U. 1636

Northern Route For Cattle

Mayor of Saskatoon Is a Strong Supporter of the N. B. R.

Mayor Russell Wilson, of Saskatoon, is a strong advocate for the completion of the Hudson Bay Railway. In a recent interview with the local Saskatoon paper his worship said:

"The mayor of Saskatoon is my policy in co-operation with the other members of the city council, the board of trade, the press and all other citizens to secure at the earliest possible date such railway construction as will link the city with the Hudson Bay Junction by the shortest possible mileage. While I cannot, of course, state definitely what that mileage would be, an approximate estimate is 175 miles. From here the P. N. R. 88 miles and from that town to Port Nelson is 424 miles, being a total of 687 miles from Saskatoon to tide water. The proposed line giving Saskatoon direct connection with the Hudson Bay Railway would, no doubt, pass through Humboldt.

"It can reasonably be anticipated," said the mayor, "that one of the many requirements in the routing of traffic following the opening of the bay route will be in connection with the great cattle industry of Southern Alberta. I anticipate the day when those cattle will pass through Saskatoon en route to Liverpool and other European ports."

"From, say, Calgary to Montreal via the Canadian Pacific Railway is 2,245 miles. From Montreal to Liverpool via the Hudson Bay route available only a portion of the year is 2,746 miles, a total, Calgary to Liverpool, of 5,000 miles, the rail haul being 45 per cent of the total mileage. From Calgary to Liverpool via Montreal and Cape Race the rail haul is 42 per cent."

"From Calgary to Port Nelson, via the proposed direct line, Saskatoon to Hudson Bay Junction, the mileage approximately would be, Calgary to Saskatoon, 400 miles, Saskatoon to Port Nelson, 687 miles, a total of 1,087 miles—say 1,100 miles—and from Port Nelson to Liverpool 2,966 miles—a total of 4,066 miles, which only 27 per cent is rail haul. The mayor, as one familiar with the subject, pointed out that while cattle in transit "shrink" during railway travel, they "pick up" on board ship. Also that the cohesiveness of the bay route insures their arrival at port of destination in fine condition and stressed two marked advantages as favoring the bay route for cattle shipment—less total mileage and lower percentage of that total being rail haul than that of any existing North Atlantic route."

Will Fight Communicable Disease

Health Officers of North America Adopt Plan of Dr. Seymour

At the first annual meeting held in Atlantic City recently of the Conference of State and Provincial Health Officers of North America, Dr. M. Seymour, deputy minister of health for Saskatchewan, who is president of the conference this year, in his presidential address brought forward a plan for increasing efficiency in dealing with communicable diseases in North America. The plan was unanimously endorsed by the conference, and has since been approved by Hon. J. C. Elliott, minister of health, Ontario, by the International Health Board and the United States Public Health Service, as well as by Hon. J. M. Ulrich, minister of public health for Saskatchewan. It was so well thought of by the conference of State and Provincial Health Officers of North America that a resolution was passed endorsing it, and it was to be known as the Seymour Plan for the control of diphtheria, smallpox and typhoid fever.

The general idea of the plan is to devote the months of September and October to the prevention of diphtheria, November and December to the prevention of smallpox, and January and February to the prevention of typhoid fever. The association has already appointed a committee, each member of which is to take the lead in his own part of the country, and steps have been taken to secure the co-operation and co-operation of the organized medical profession, of all voluntary health organizations, and of the press.

Strange Aquatic Animal

A strange looking aquatic animal reported to be half the length of a canoe, and believed to be a giant sturgeon of a species known to abound in northern waters, was seen in the Ottawa River recently. It was reported to be one of two pet alligators who escaped from Ajmer, Quer, last fall, but naturalists claim an alligator could not survive a winter in a frozen river.

Just wishing things would change is about like striking a match to the thermometer to make the room warmer.

"IDEAL" fashions by J. P. B. Hamilton

1339

Jobot Treatments Lend Grace to Daytime Frocks

This chic frock illustrates the simplicity of treatment which expresses the correct note for general daytime wear. Developed in one of the wide bordered creases, it has soft gathers at each shoulder where the back comes over to meet the front, creating, as it were, a wide effect. Gracefully draped Jobots outline the deep front opening, and an inverted plait extends from the waistline to the lower edge of the skirt. The back is straight and a narrow belt creates the new blouse effect at the sides. No. 1339 is in sizes 36, 38, 40, 42 and 44 inches bust. Size 38 bust requires 4 yards 28-inch for dress made of plain material; or 3 1/2 yards wide bordered material as illustrated. Price 20 cents. Many styles of smart apparel may be found in our new Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

Planning Patrol Of Arctic Archipelago

This Year's Expedition Will Attempt Completion of West Coast

Preparations for the 1926 patrol of Canada's Arctic Archipelago are being made by the North West Territories and Yukon branch of the department of the Interior. This year's visit to the far northern posts will be made in the S.S. Beothic, a sailing vessel of 2,700 tons capacity, and the expedition will start from North Sydney, N.S., instead of Quebec. The posts already established will be visited and an effort made to complete the establishment of the new post at Bache Peninsula on Ellesmere Island, in latitude 78 degrees north.

The ship is expected to return in late September or early October. George P. MacKenzie will again be the officer in charge.

Captain Falk will command the vessel. About ten members of the Royal Canadian Mounted Police will be taken north to relieve those coming out.

Dr. I. J. Weeks, who accompanied last year's expedition as geologist, also will be included in this year's party. He, with an assistant, Maurice Haycock, will establish a base at Pangnirtung, on Cumberland Sound. They will remain in the north until October, 1927, studying geographical data on the interior of Baffin Island.

Canadian Judges at American Show
J. Charles Uley, of Carleton Place, is appointed judge of Short-horns for the Illinois state fair at Springfield, Aug. 21 to 28. Dean H. Barton, of Macdonald College, is scheduled to judge the milkings Short-horns at the Sequenential fair at Philadelphia, Sept. 12-15. Canadian judges are not for the quality of these work wherever called on to perform.

A man has outlived his usefulness when he is no longer capable of giving advice.

Success is the only thing that can turn a man's head when he has a stiff neck.

Great Changes At Kiel
Years Have Made Vast Difference In Island Fortress

Nowhere would the Kaiser, were he to return to his country, find a more poignant contrast between the present and the past than in Kiel.

William II. was the creator of this powerful naval fastness, with its huge docks and all the apparatus of ship-building and repair. He was the builder of the formidable fortifications defending the sea approaches. He was the scene of some of his great moments when as commander-in-chief of the fleet he steamed into the harbor as rounds of applause poured from dozens of guns.

Today the harbor looks empty. The forts are partly dismantled. The naval academy is closed. The castle in which Prince Henry, the Kaiser's brother, lived is an office building. The Yacht Club House, presided by the elder Krupp, is now a scientific institute. It was there the Kaiser, surrounded by his admirals and generals, made many a decision that caused flutters in foreign chancelleries. Everywhere are suggestions of decay and neglect and change.

Not Considered A Handicap

Many Remarkable Feats Accomplished By Men With Artificial Legs

Recent questions in the British Parliament regarding the supply of artificial limbs to ex-soldiers drew from the minister of pensions some illuminating statistics and facts bearing on the feats accomplished by one-legged men. One interesting revelation was that it is seldom nowadays that a man who has lost a limb is unable to re-secure regular employment, so great have been recent advances in the designing and making of artificial legs and arms.

There are men today who are so little restricted by the use of a false limb that they are as efficient as if they had the normal complement of arms and legs. One man who lost a leg four years ago has driven a car upwards of 300,000 miles and has never had an accident. Another man, similarly placed, takes part in motor racing contests.

Men with wooden legs have made fine records as athletes. A man with two broken legs walked a mile in 3 1/2 min. Another, with an artificial leg, broke a record with a high jump of 5 ft. 7 in.

England Holds War Pageant

Greatest Military Tournament Ever Held Was Staged at Aldershot

Probably the greatest military tournament ever held in England, was that staged in a 20 acre arena at Aldershot on June 15 in the presence of 30,000 persons.

The producers stirred up history thoroughly and rapidly, for scarcely 40 minutes elapsed between the overthrow of the Saxons by William the Conqueror and the encampment of the modern British army under the walls of an eastern city with the latest thing in aeroplanes dropping bombs and tanks travelling 20 miles an hour.

The Charge of the Light Brigade was depicted with such rapid accuracy that the actual trumpet used at Balaklava was heard again and the gunners handled genuine brass guns of the Crimean period.

The massed bands totalling more than 1,000 pieces was an impressive part of the event, but truly stirring was the final incident when the whole might of the company sang the hymn, "The Day Thou Gavest."

Populous India

With 350,000,000 Inhabitants, India Has Over 200 Languages

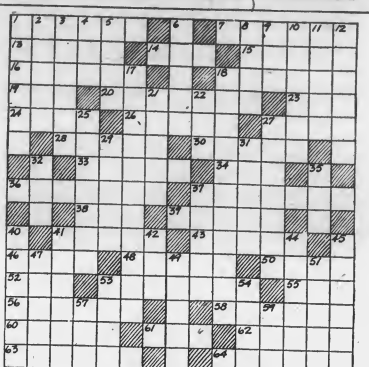

Some idea of the number of people living within the borders of India may be learned by totalling the 100 nations who populate Canada, the United States, South America and Africa, declares Paul Verghese, prominent scholar of science.

In a recent address, Mr. Verghese spoke of India's 350,000,000 population and said 250 different languages were used in the many districts of the country. This provided many tremendous and some unsolvable problems which might be held responsible for the continuous strife faced by India. Mr. Verghese stated the people of his country were intensely religious and prepared to make any sacrifice, but he emphasized the fact that only about two per cent. of them were believers in the Christian faith. He appealed for more missionary workers to go into his native land.

Wedding In Church For Dear

The first wedding in the New Evangelical Church of the Dear, Toronto, took place in June, when Miss Elsie Ellison was married to Mr. Silas Skarsvill, Rev. A. L. Richards officiated and the words of the marriage service were interpreted by Mrs. J. R. Byrne.

WHEN USING WILSON'S FLY PADS READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

There is only one way to kill all the Flies

This is it—Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water, but not flooded) on the window ledge where the light is strong, leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below.

Put the plates away out of the reach of children until required in another room.

The right way to use Wilson's Fly Pads

Strange, Romantic Love Adventures of the Flapper you know

Joanna

THE STORY THUS FAR

JOANNA, a pretty, ultra-modern, shop girl is told by her employer that she has been given a million dollars to spend by an unknown benefactor. She is not even to know his name, there are no "conditions" to meet before she can get the money. Nothing more than this can be gained from banker Eggleston, nor his suave, man-about-town nephew, Brandon, who informs her that he intends to use the money while helping her write her first check. Tired by this sudden deluge of wealth, hurt because her friends and acquaintances will not believe in her return home happy after an orgy of buying to find John, her silent, almost sweethearts and Brandon awaiting her. Brandon is suave, John almost boorish. After Brandon leaves, John informs Joanna that he does not believe she is the money-honorary. He is angry.

CHAPTER VIII.—(Continued)

With her awakening to the new day—the first full day of her new estate, varying emotions rushed in confusion into Joanna's mind. Her first thought was of John. With it came the surge of recollection of the scene in the drawing room only. She winced at the sudden memory. She had not got hold of his right away. She wouldn't lose a minute—before he went to his work. She buried her hand in the hair on the pillow beside her. George had snubbedly shut her eyes. Nothing to be ordered by any household, but opened them wide at the viciousness of Joanna's tug at her slung head.

"File out and get dressed," Joanna

PAINS ALL OVER BODY

Two More Cases of Feminine Illness Relieved by Lydia E. Pinkham's Vegetable Compound

Barrington, N. S.—"I had terrible fevers, headaches, and aches and pains all over my body. I would have to go to bed every month and nothing would do me good. My husband and my father did my work for me as I have two children and we have quite a big place. I read in the paper about Lydia E. Pinkham's Vegetable Compound, and then got a little book about it through the mail, and my husband sent to Eaton's and got me a bottle, and then we got more from the store. I am feeling fine now and do all my work and am able to go out around as usual. My friends tell me I look like my friends. It is Lydia E. Pinkham's Vegetable Compound that makes me feel so well."—Mrs. VICTOR RICHARDSON, Barrington, Nova Scotia.

Dull Pains in Back
St. Thomas, Ont.—"I took four bottles of Lydia E. Pinkham's Vegetable Compound and found great relief from the dull, heavy pains in the small of my back and the weakness from which I suffered for five years after my boy was born. After taking the Vegetable Compound and using Lydia E. Pinkham's Sanative Wash, am feeling better than I have for the last seven years, and advise my friends to take it."—Mrs. F. JOHNSON, Moore Street, St. Thomas, Ont.

W. N. U. 1636

"I don't want you to call him. Don't be silly. I was only joking. Just get the breakfast." Take a five hundred dollar bill and tell me what delicate caten men look like when they have fits."

Which George gaily did. Her report was hysterical, satisfactory, sobered only by the discovery that she'd been shortchanged ten dollars out of the twenty dollar bill she had finally given him.

"Let him keep it," Joanna ordered, shortly. "It'll be something to remind him of the next time he refused you credit."

"If you got me those dolls you've promised me," George retorted, "I'll get my herring and dill pickles at the Ritz. See if I don't. All I need is clothes to get out of the delicatessen class."

Joanna shot a keen look at her, but said nothing. John had turned her soul against preaching.

The beautifications that are suitable to new street tailors, Joanna's which she had worn the afternoon before, and her preliminary gift to George, which George had blossomed in for the evening, are not hasty ceremonies. It was well toward noon when the two girls settled in their taxi. And then George had to wait, a block from the store, where she would be so detailed as having broken neither a leg nor a neck, while Joanna presented herself to Mr. Graydon's secretary. She just wanted to talk to him again, she explained, and to let him see her.

The "how" of yesterday made her understand that he was her "friend" of today, and all days. He thanked her, gently, for stopping in, and hoped that she would come in often. But he would not give her the thing she asked. Advice. Something that would be a hint to her of what was expected of her, of what she should do to carry out the wishes, or the plans, of her unknown benefactor.

"I have been cautioned by your banker, Eggleston," he said, "that I must not pretend to advise you. Not now, at any rate. Mr. Eggleston is emphatic in saying that a condition that went with the money was that you solve your own problems. After a while, perhaps, some of the severity of the ban may be lifted. Just now I mustn't interfere."

"Am I just to take all this money and go out and spend it, then?" Joanna persisted.

"Just go out and spend it—somehow. I suppose that is one way of repeating that you may do with it whatever you wish."

So naturally that she did not know that she was doing it, she began to tell him about Cohen, and Mrs. Adams, and John. Suddenly she hesitated and was ashamed. "But all that doesn't interest you, does it?" she apologized.

The gray man had been watching her intently. Almost eagerly. He reassured her quickly. "On the contrary, Joanna, that is just what I mean. It does interest me tremendously. Won't you go on—about John?"

You straightened him out, I hope and it's quite all right, now?"

"No," Joanna replied, her voice quivering a little. "I didn't, and it isn't. I'm afraid it's all crooked in my mind."

"What are you going to do about it?"

"Just let it stay crooked, I guess. Crooked things that ought to be straight, must get that way by themselves. I think. If they have to be hammered out, they're only make-believes."

"She was silent, for a minute, then added so suddenly that Graydon was sure she hoped to catch him off his guard.

"What would you do about it if you were in my place?"

He smiled. "That is one of the very things I mustn't advise you about. But I shall want to know, very sincerely, when it begins to straighten out—and see what happens then. I shall be interested in John."

"Well, that's more than I am, right now," the girl retorted. She was rest less under the keen scrutiny with which Graydon was suddenly observing her. She was still uncomfortable when she said goodbye to him. She had intended to ask him to let part her affairs he thought Brandon was to play. But she concluded that she would have to find that out for herself. It was then that she resolved that perhaps Brandon could show her the way to go, as well—better, perhaps, than John.

Chinese Believe Bones Have Medicinal Value

Ground Fossilized Bones Mixed With Greatly Bring Fabulous Prices. The search in Asia by the expedition of the American Museum of Natural History and the Field Museum of Chicago under the leadership of Roy Chapman Andrews in the hope of finding the cradle of man has led to a strange coincidence, to competition with an old established Chinese business. Not that the competition endangers a native industry, for the bone supply is as plentiful as the number of persons who have faith in the medical value of powdered fossilized bones.

Dragon bones, so-called, are found in many parts of China, but it is only in the province of Szechwan that scientists have come into competition with the industry, and then only in small degree, and in the vicinity of the Yangtze gorges, now becoming so well-known to tourists who have leisure to make a 1,200-mile water trip inland from the sea. "The dragon bones bring \$6 a hundred pounds, but under imaginative names and legend of cures brings their weight in gold in the apothecary shops after they have been ground to powder and mixed with grease or a little phosphate. Dragon bone medicine is a cure-for-all in China and is a story in itself.

Interesting Variety Of Plants Seed Is Sent to Ken Gardens, England.

From Explorers in Different Parts Of The World

In the Ken Gardens, England, a variety of plants may be seen grown from seed sent home by explorers in different parts of the world. There are yellow and purple irises found by the Mount Forster Expedition; blue poppies sent home from Tibet by Mr. Kingston Ward, who recently returned from a year of plant exploring with Lord Cawdor; a yellow saxifrage sent by Mr. Forest, the plant explorer, who is now in China, and new gentians from the collection of Mr. Rock, the American plant explorer, who is not long back from exploring the northern part of Western China. There are also numerous new primulas sent by all the explorers, but as they are found growing at an altitude of 10,000 ft. to 15,000 ft., they do not like the English climate.

Minard's Liniment for Rheumatism

Designer of Norge Honored Col. Umberto Nobile, who designed the dirigible Norge, and piloted it across the North Pole from Europe to Alaska, has been made a general of the Italian air service in command of all its operations.

The musician who plays by note has to face the music.

Why Suffer With Itching Rashes

When a warm bath with Cuticura Soap and application of Cuticura Ointment will afford immediate relief and point to permanent skin health in most cases when all else fails.

Respectfully Free by the Adm. Adm. Cuticura Soap and Ointment. Cuticura Soap and Ointment. Cuticura Soap and Ointment.

Gradually Clearing Scapa Flow

Cruiser Hindenburg When Scrapped Will More Than Pay Salvage Cost. Sunk by her crew at Scapa Flow over six years ago, the German cruiser Hindenburg will be added again in a few months. How is it to be done, and what will happen then?

Already twenty-one smaller warships have been brought to the surface by means of wires passed under them from floating docks, but the Hindenburg, with a tonnage of 27,000, is much too heavy for that. She is to be made to rise of her own accord by having the water pumped out of her.

To do this at her portables and all the eight "sea cocks" the Germans opened to sink her, will have to be covered with patches of concrete or steel. To get at the sea cocks, which are round holes in her hull, two feet across, it will be necessary to make tunnels in the ice bed on which she lies and to scrape away the barnacles and seaweed that cover her bottom.

All this will take twelve divers six months, but when they have done forty pumps will pump out some thing like 50,000 tons of water in twelve hours, and the Hindenburg will then slowly rise to the surface.

And what then? She will be run around and broken up for scrap, the value of which will be more than worth the cost. After that the remaining big ships will be raised, at the rate of two a year, till Scapa Flow is clear of them.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child. The Tablets are so good. They are absolutely free from opiates or other harmful drugs and the mother can always feel sure of their safety.

Concerning the Tablets, Mrs. John Armour, R. K. 1, South Monaghan, Ont. says: "We have three fine, healthy children, to whom, when a medicine is needed we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make feeding easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Had A Real Grievance

Train Being Late Extended Length Of Sunday Sermon

The railroad superintendent, after becoming his visitor to a chair, invited him to outline his complaint. "I wish you would tell the engineer on the express that passes through Bird Centre to quit whistling Sunday mornings just before noon," said the visitor. "That's impossible," replied the official. "Why do you make such a strange demand?" "Well, you see," explained the visitor, "our minister preaches until he hears the whistle blow, and your train was twenty minutes late last Sunday."

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Detecting Crimes By Dust

Clever Detective Resorts To Use Of Vacuum Cleaner

Probably the cleverest living detective is Professor Locard of Lyons, whose feats are the wonder of all Europe. Many of them, curiously enough, have been performed with the help of a vacuum cleaner, with which he draws specks of dust, etc., from the clothing of suspected persons; and these microscopic clues have already sent dozens of murderers to the gallows.

Ricksha Pulling Hard Work

Men Following This Occupation Wear Out In Five Years

Sociologists looking into the question of life in China, have determined that the business career of those furnishing the motive power for the man-drawn ricksha is only five years. Such is the endurance period of the arduous work. In and out of employment there are from 40,000 to 50,000 rickshamen in the metropolitan district. Street cars are slow to gain popularity.

Good Measure

Mr. John Hobart went to Kansas City last week with a "box" of hogs. Several of his neighbors went in together to fill up the car.

Many a poor woman who works sixteen hours a day has a husband who grows about how much it costs him to support her.

Little Helps For This Week

Cause me to know the way wherein I should walk.—Ps. cxlvi. 8.

Then a voice within his breast Whispered audible and clear, "Do thy duty, that is best, Leave unto thy Lord the rest."

Keep close to duty. Never mind the future, if only you have peace of conscience; if only you feel yourself reconciled, and in harmony with the order of things. Be what you ought to be; the rest is God's affair. It is for Him to know what is best.

—Henri Frederic Amiel.
Let us stand by our duty, fearlessly and effectively.
—Abraham Lincoln.

Livestock Improvement Train
Demonstration Car, Lecture and Motion Picture Car to Tour Saskatchewan
Under the auspices of the Provincial Department of Agriculture, the Cattle Breeders' association, Moose Jaw Livestock Exchange and the Canadian Pacific Railway, a livestock improvement train will be operated in the province of Saskatchewan for the fifth season. The train will consist of eight cars, three of purebred bulls, one of butcher steers, one of dairy cattle, one demonstration car and one lecture and motion picture car. The sale of good sire is the principal object of the train, but lectures and motion pictures will be provided for educational purposes.

For Rheumatic Pains.—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Electric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Gold Finder Did Poor

After making and losing several fortunes, James Macdonald, was first to discover gold in California, died in poverty and solitude in a lonely cabin close to the spot where he made his epochal discovery of gold 37 years before.

You can almost see the cracks in the voice of some people when they attempt to sing.

First Annual Contests A. C. N. P. (Continued from Page One)

the following results and marks:
A Class, Over 15 Years
Bellevue—marks 426, 1st prize.
Coleman Tuxis No. 1—marks 428
2nd prize.

Coleman Tuxis No. 2—marks 376
3rd prize.
B Class, Under 15 Years
Blairmore No. 2—marks 423, 1st prize.

Blairmore No. 1—marks 326, 2nd prize.
The personnel of the teams was as follows:

Bellevue—R. Warn (Capt) Frank Furner, J. Radford, J. Williams, J. Jackson, W. Warn, Jr.
Coleman Tuxis No. 1—Mack Hall (Capt) Rolt Wilson, Fraser McLeod Jr., Matthew Barrell, Angus Cameron, James Kilgannon.

Coleman Tuxis No. 2—Hugh Danlop (Capt) Alex. Balloch, Win. Balloch, Dave Flynn, Sam Gillie, Win. Chapman.

Blairmore No. 2—Win Hamilton (Capt) Duncan Hamilton, T. Hamilton, Albert Chappell, J. Farmer, A. Barreclough.

Blairmore No. 1—Greil Johnson (Capt) Henry Thompson, Frank Thompson, J. McPhail, A. Bartelli.

The work of the boys was carried on from 3.30 to 6.30 p.m. in the curling club rooms adjoining the Arena. The judges commented very favorably and congratulated the teams on the splendid work accomplished during the day. It was unfortunate that the tests could not have been conducted outside where more people would have had the opportunity of witnessing the good work done by both seniors and juniors.

Free lunch and dinner was provided for all those taking part at the Grand Union Hotel.

The prizes were presented in the evening to the Seniors by Mr. Geo. Kellock, general manager of the McGillivray Creek Coal & Coke Co., who outlined the work done by the committee to carry the affair through successfully, and also congratulated the teams on the splendid way they had performed their problems. He also mentioned that the International team, which had the honor of winning the first prize that day, also had the honor of winning the Coderre Cup this year. This cup is open to all miners First Aid teams throughout Canada.

Mr. O. E. S. Whiteside, general manager of the International Coal & Coke Co., presented the prizes to the Juniors, congratulating them on their splendid work, and stated that Coleman was proud to have the first annual First Aid Contest held here. He advised the boys to continue with the work as it would not only be beneficial to them, but they would be able to render assistance to others, and he sincerely hoped the boys would continue and become even more proficient in the work to enable them to carry the high honors won by Coleman men.

The following gentlemen acted as judges for the contest, and great credit is due them in carrying out the difficult task entrusted to them: Dr. Groff, Edmonton; Chief Faulds, Taber; Dr. Walker, Pincher Creek; Mr. Noble, Winnipeg; lecturer and examiner of First Aid classes of the Canadian Pacific Railway.

At the hotel the judges were presented with a souvenir in the form of a gold mounted pencil in recognition of their work. The presentation being made by the Chairman Mr. M. Johnson.

The beautiful silver cup donated by McGillivray Creek Coal & Coke Company, known as the McGillivray Cup, will be held for one year, or until such time as the second annual contest is held, by the first winners, International team.

Thanks are due to all who helped to make the contest such a complete success. Particular mention is due the McGillivray Creek Coal & Coke

Personal and Local

Miss Mildred Brown, of Spring Point, Alta., has been the guest of Mr. and Mrs. J. L. Lonsbury for the past few days.

The Red Cross Society acknowledges with thanks donation of \$5.00 received from the Pythian Sisters holding box No. 13690. Total collections to date \$120.27.

Mr. and Mrs. J. Emmerson and family expect to take up residence in their summer cottage at Crow's Nest Lake the latter part of this week.

Mrs. J. Davey, of Macleod, who has been the guest of Mrs. Robert Holmes, 6th street, for the past week, left for her home Tuesday.

According to an announcement in our advertising column this week, Mr. J. M. Rushton has taken over the grocery business formerly conducted by J. Johnson & Sons, and will conduct same under the name of the "Rushton Cash Grocery." Jack is well and favorably known in Coleman and will no doubt do well in his new business venture.

The Blairmore Town Council have decided to construct a swimming pool for the children of that town. Work is to be commenced at once and it is expected that the pool will be ready for use about the middle of this month.

A dance is being held in the Italian Hall on Friday evening of next week, commencing at 9 p.m. Melody Boys Orchestra in attendance.

Dr. J. A. Tolmie is leaving Coleman about August 1st to make his home at Vancouver.

The Millinery Demonstration held under the auspices of the local branch of the Women's Institute, commences on Friday of this week in St. Paul's Church Club room and continues Saturday and Monday. Mrs. Davidson is the demonstrator in charge.

The Coleman Garage unloaded another carload of Fords on Monday of this week.

A meeting is to be held in the I. O. O. F. hall on Friday evening at 8 p.m., for the purpose of endeavoring to form a branch of the Native Sons of Canada in Coleman.

The combined I. O. O. F. and Rebekah lodges are holding a bus picnic on Sunday, July 11th, west of Saultine on the old Summit road. All members and visitors of these lodges are invited to meet at the I. O. O. F. hall at 1 p.m.

Last week it was a case of, on again, off again, Finnegan, at Ottawa. The Mackenzie King Liberal government met defeat and Arthur Meighen formed a "shadow" cabinet in an endeavor to carry on. He lasted exactly three days, and then we had no government at all. Premier Meighen is now getting to gether a cabinet and making arrangements to hold a general election which is expected to take place the latter part of September. To the man on the street it seems we are getting more than our share of elections and governments. Here's hoping that the forthcoming one in September will settle the question for at least five years.

Say It With Flowers

When you require flowers artistically arranged for any occasion, at moderate prices, and of unequalled quality, phone No. 13, THE COLEMAN TRADING CO., LTD., agents for Frache Bros., Lethbridge.

Company who erected a large platform on the sports grounds where the problems were to have been carried out, weather permitting, also the directors of the Coleman Crystal Rink and the Elks Lodge for the use of the Arena at the time the Carnival was being held.

Mr. Geo. Brown, of the local C. P. R. staff is on holidays.

A new fence has been erected around the International Coal & Coke Company's office and the ground prepared for a lawn.

John Salvador's residence on Second street west, has received a coat of stucco and paint which has added materially to its appearance.

Mrs. Fraser-McLeod and children, of Mercoal, Alta., arrived on Thursday of last week, and are the guests of Mr. and Mrs. A. W. H. McLeod. Mr. Fraser-McLeod is expected to arrive in the course of a couple of weeks to spend a holiday in Coleman.

Rev. H. J. and Mrs. Bevin and family, of Gleichen, arrived in Coleman last week and have taken up residence in The Manse.

Mr. and Mrs. A. F. Short left on Sunday for Calgary to attend the Fair and Stampede.

Mr. and Mrs. J. Morgan, Mr. P. Garry and Mrs. J. Doyle, of Cowley, were in Coleman last week and took in the Carnival.

Miss Adela Whiteside, daughter of Mr. and Mrs. O. E. S. Whiteside, arrived home on Thursday morning last from College at Vernon, B. C., to spend the summer vacation at her home here. Miss Whiteside met with an unfortunate accident a short while before leaving Vernon, while playing tennis, which necessitates the use of crutches for a week or two.

Mr. and Mrs. H. C. McBurney, accompanied by Mr. and Mrs. Leacock of Calgary, who were their guests last week, left by car on Sunday for Calgary to take in the Stampede.

Triple-Sealed to Protect the Performance of McLaughlin-Buick's Famous Engine

IN the Better McLaughlin-Buick you will find the most important motor car improvement in recent years—the "Triple-Sealed" Valve-in-Head engine. Dirt inside an engine destroys efficiency. It grinds away at cylinder walls and bearings, causing looseness and vibration. McLaughlin-Buick's "Triple Seal" (air cleaner, oil filter and gasoline strainer) prevents this—halts dirt and grit at every possible point of entry. McLaughlin-Buick leads in motor car advancement. Wherever there are motor cars, the McLaughlin-Buick Valve-in-Head extra power, its economy and its sturdiness. The McLaughlin-Buick "Beated Chassis" places every operating part inside an armor of steel housing to keep dirt out and lubrication in. And Buick performance from the destructive grit of the road. No other car, regardless of price, so completely safeguards its performance. For more efficient service, for finer transportation at lowest cost, buy a McLaughlin-Buick. The Better McLaughlin-Buick leads in registration all cars in its price range. The new low GMAC financing rates are available to purchasers of McLaughlin-Buick only.
